Reviews 2016/17								
	Burton Market Hall	Mar-16	Oct-16		<p>That the findings of the review are considered by the Cabinet.</p> <p>The Committee recommends that a specific business plan is drawn up (drawing in the facts, data and suggestions gathered during this review) which focuses on delivering the objective of a bustling daytime economy, whilst also ensuring that the market delivers either a surplus or break-even position within a specific time bound period. The business plan should consider options such as an extensive and detailed exercise on learning from other markets, it should investigate and consider options such as an external board, partnering with other groups, and bringing in external expertise where appropriate. It should also include further input and feedback from tenants, former tenants, prospective tenants, shoppers and other stakeholders.</p> <p>Where specialists are procured to provide advice on future projects such as this (or similar) that particular consideration is given and due diligence is undertaken to ensure appropriate experience and expertise, and also appropriate safeguards built into the process to ensure that the Council has a strong position to seek recourse from these specialists should issues arise in the future based on the veracity of their advice or expertise.</p>	Undertaken by whole of VFM Scrutiny Committee	N/A	N/A
