1. Introduction

This report summarises the work of Internal Audit to early/mid March, in relation to the 2018/19 internal audit plan delivery.

The purpose of the report is to:

- Show progress against the audit plan;

4. Recommendation tracking

Recommendations and agreed actions are uploaded to a web-based database when reports are finalised. Managers access the system, and update status and mark actions as implemented when appropriate. The first table below sets out a summary of agreed actions, which were due to be implemented by 1/3/19. The second table shows the age of those agreed actions (based on the original date due for implementation) which are not yet complete. Members should note that the status of each action is as stated by management and not verified by Internal Audit unless a specific follow up has been undertaken.

As previously requested by the Committee, a summary for all agreed actions which were due for implementation by 1/3/19 and which managers have not yet recorded as fully implemented, are set out below, together with a summary of the most recent update from managers/officers responsible. As the action tracking system is based on management updates to agreed actions, this does not imply that Internal Audit has verified the status in such cases.

In this case there are no such outstanding actions.
